

leva x

advanced technologies combined with traditional ideologies

AVAILABLE NUMBER OF GROUPS: 2 | 3

Featuring eye-catching design and lower profile to invite customer engagement, Leva re-invents the iconic lever machine design with more ergonomic elements.

Leva is a cutting-edge café centerpiece that encourages engagement, barista experimentation and coffee

conversations, while delivering the world's best coffee extraction. Leva brings with it design, focusing on the physical beauty only found in a truly mechanical system. The user can intervene in the pre-infusion pressure, shot volume and extraction pressure on each group.

Leva improves temperature stability of the traditional lever machine thanks to smart PID temperature control. Leva's digital displays show real time extraction pressure on the coffee puck, the pre-infusion and extraction time as well as the pressure curve of the shot.

standard features

Independent Boilers

Separate boilers for each group head allow barista to optimize temperature for individual coffees.

Dual Boilers

Separate boilers optimize espresso brewing and steam production.

Smart PID (Coffee Boiler)

An advanced PID control greatly improves the machine's temperature stability.

PID (Steam Boiler)

Allows you to electronically control steam boiler temperature.

Live Pressure Visualization

Live visualization of pre-infusion pressure, extraction pressure, and time throughout the course of the shot.

Saturated Groups

Ensure unsurpassed thermal stability, shot after shot.

Insulated Boilers

Reduce energy consumption while contributing to temperature stability.

Graphic Display

Intuitive programming makes it easy to adjust machine parameters.

Military-Grade Steam Potentiometer

Proportional steam valves facilitates machine usability and maintenance while improving its durability.

Pro Touch Steam Wands

High performing steam wands that are cool to the touch.

Adjustable Drip Tray

Allows you to use the machine with tall, to-go cups.

Exposed Groups

Ergonomics and workspace visibility.

Portafilters & Precision Baskets

Stainless steel portafilters and precision baskets improve your cup quality and consistency.

Hot Water Economizer

Enables you to fine-tune the tap water temperature for tea.

Eco Mode

Can be programmed to enter stand-by mode, improving energy efficiency.

USB

Making it possible to update the firmware.

special order

Cup Warmer

Maintain espresso and cappuccino cups evenly heated at a proper temperature.

Personalized Colors

Customizable colors based on the RAL color system, on request.
